Ukraine is at war.

**War** is when there are:

- people fighting using guns
- a lot of people die
- a lot of people get hurt
- homes and buildings are bombed.

Russia started the war.

It is not safe for people who live in Ukraine to stay there.
We need to leave to go to a place that will keep us safe.

The safe place may be in:

- a shelter
- another country.

You may be feeling:

- scared
- confused
- angry.

We know it is hard:

- to leave your home
- not do the things you do every day
- be in a place you do not know.
When we leave you cannot take very many things with you.

If you can take a bag with:

- clothes
- any medication you take
- your passport if you have one
- your phone and phone charger.

You need to wear:

- a warm jacket
- your shoes.

Listen to the people who are caring for you - they will do their best to look after you.
